25 years old

### MAJOR

Master of Science in Nursing

### FREQUENCY OF USE:

Weekly

### GOALS:

- Childcare Options
- Affordable Housing
- Access to Public Transportation

### KEYWORDS:

Driven, Compassionate, Dedicated

### ABOUT BROOKE

After finishing her undergraduate degree at another school, Brooke worked for a few years before realizing she wanted to continue her education to earn her Master’s Degree in nursing. While she’s excited about the practice of nursing, she also wants to have an opportunity to teach at the college level. It’s important that she lives close to campus so she can take advantage of public transportation and child care services that are available locally. She would love to attend school and live somewhere that provides opportunities for her to enjoy spending time with her young daughter, such as museums and parks

She is concerned about the time it will take to earn her degree, and would like to know what courses are involved and what her schedule will look like before she commits to a specific program. Her goal is to earn a nursing degree from a well-respected program, so she has the best chances for securing a job after graduation and possibly mentoring other nurses in the future.

She owns a laptop, Android phone and tablet, and is active on social media in order to stay in touch with her family and friends. She relies on her mobile devices to keep her organized, stay on schedule, and feels that it allows her to make sure she sets time aside for taking care of her daughter.

### CONCERNS:

- Completing her degree in a timely manner
- Graduating with opportunities abroad
- Finding a balance between student and mother
- Living close to campus for ease of commuting, and having access to public transportation
- Graduating with a job lined up
