

My research is important to me, and I want to work at an institution that values research, as well as has the funding options to keep my research moving forward.

## Robert, Ph.D, M.D.

### AFFILIATION TO CWRU

Prospective Faculty Member

### AGE

37 years old

### DEPARTMENT

School of Medicine

### FREQUENCY OF USE:

Daily

### GOALS:

- Access to research tools
- Access to several funding options
- Online resources

### KEYWORDS:

Research-focused, Collaborative

### ABOUT ROBERT

Dr. Robert Hunt is a recent graduate from Cornell University with a Ph.D in Biochemistry. He is currently looking to secure a full-time, tenure track faculty position at a reputable university, and has applied to several openings for the upcoming fall 2017-2018 school year.

His research is his life, and he was very careful about where he put in applications because he wants to continue the research he started in his doctoral program, and needs to work at an institution that values research and also has access to many different funding options and opportunities.

Before he sent out any applications, Dr. Hunt went to the prospective university's websites and did a thorough search to make sure the schools offered what he was looking for. He is very technologically savvy, and went so far as to read twitter feeds, check out university review websites, and Facebook for further research and review. He relies heavily on his HTC 10 smart phone and Microsoft Surface Pro to keep him organized, and utilizes the Google Drive in order to have 24-hour access to his files and important information, wherever he goes.

### CONCERNS:

- Securing a full-time, tenure track faculty position at a reputable research institution
- Continuing the research he started while pursuing his Doctoral Degree
- Securing funding for his research through university and outside donors
- Feeling personally connected to a university during his employment search
